"Confidence comes from good training"

This is to certify that AJS HAZ Training will provide the following DGSA services and functions to Toyota Material Handling UK Ltd.

Functions of Safety Advisers

Monitoring compliance with the rules governing the transport of dangerous goods

Advising the employer on the transport of dangerous goods

Ensuring that an annual report to the employer is prepared on the dangerous goods activities of the employer

Monitoring the following practices and procedures relating to the transport of dangerous goods

- The procedures for identification of dangerous goods
- The practice in taking into account, when purchasing means of transport, any special requirements in connection with the dangerous goods to be transported
- The procedures for checking the equipment used
- Proper training of the employer's employees and the maintenance of records
- The implementation of proper emergency procedures
- The investigation of and, where appropriate, preparation of reports on serious accidents, incidents, or serious infringements
- The implementation of appropriate measures to avoid the recurrence of accidents, incidents, or serious infringements
- The account taken of the legal prescriptions and special requirements in the choice and use of sub-contractors or third parties
- Verification that employees involved in the transport of dangerous goods have detailed operational procedures and instructions
- The introduction of measures to increase awareness of the risks inherent in the transport of dangerous goods
- The implementation of verification procedures to ensure the presence of the documents and safety equipment which must accompany transport and the compliance of such documents and equipment with health and safety regulations, and
- The implementation of verification procedures to ensure compliance with legislation governing loading and unloading of dangerous goods.
