
Quality, Health, Safety, Environmental & Energy Manual:

Document No: SM-67 Pandemic Business Centre Re start Approval

TMHUK is committed to ensuring all team members, contractors and visitors coming to their business centres during a pandemic remain as safe as is reasonably practicable. Additional safety controls and protocols have been implemented in all business centres.

A plan will be established and will identify which business centre has been approved for a trial restart and when a review of the controls and protocols have been completed and approved.

Each business centre will 'trial' the controls in order to test their effectiveness and a review will be carried out with the business centre leaders and QHS Manager or QHSE Advisor prior to the centre controls being approved as successful.

Controls and protocols may be changed at any time and with short notice if the local or national authorities update their guidance or if TMHUK Senior Management decide a change is necessary.
